

Pondering Plants Itinerary

Through interactive activities and crafts, your child will discover what's so great about the plant world, how we are connected, and why it's important for us to take care of them.

Monday – Plants grow through life cycles just like you!

Discover the life cycle of a plant and the important role flowers and pollinators have in making seeds.

Tuesday – Forests provide much for many.

Explore the forest to take a detailed look at its largest plants, trees, and all the wonderful things it provides.

Lightweight, long pants and shirts and close-toed shoes, like sneakers, recommended.

Wednesday – Prairies support many lives, big and small.

Amazing secrets of the prairie will be revealed as we immerse ourselves within it and use tools like insect nets and hand lenses.

Lightweight long pants and closed toed shoes recommended, as we will be walking through tall grass today.

Thursday – Aquatic plants provide food, shelter, and clean water.

Get wet and muddy as we learn about the benefits aquatic plants provide everyone that lives in and around waterways.

Wear clothes and shoes that will get wet and muddy. Bring a towel (for the car seat) or extra dry clothes to change into after camp.

Friday – Native plants need your support to thrive.

Identify a few "invader" plants that out compete for resources with plants in your community. Then become stewards by removing those "invaders" which will help native plants thrive.

Lightweight, long pants and shirts and close-toed shoes, like sneakers, recommended.

Cancellations or changes to this camp due to weather will be emailed to the address(es) you listed on the camp health form. For questions or concerns, call Camp Director, Jenny Sazama at 847-276-5382.
