**BACKGROUND:** Invasive plant management is the most time-consuming task faced by District crews, and is a significant challenge to habitat conservation. Management of invasive plants is necessary to improve and conserve habitat quality and species diversity on District properties throughout Lake County. The District conducts removal of invasive woody species as part of a Land Management Program to restore and enhance woodlands, savannas, prairies and wetlands to increase the health, diversity, and sustainability of flora and wildlife populations and to restore or enhance ecosystem services.

The District bid out multiple clearing projects, each indicated as a separate preserve (Project) located throughout Lake County under one consolidated bid process. Each Project has its own Scope of Work and Specifications. Work includes all labor, equipment and materials to selectively remove invasive woody trees and shrubs and thin select native species, and includes disposal services and follow-up selective herbicide applications.

The project was advertised on August 3, 2017. Work is anticipated to begin December 15, 2017 and be completed by August 1, 2018. Following is a summary of the low bidder and low bid for each Project:

Cuba Marsh Forest Preserve: V3 Construction Group, Ltd., Woodridge, Illinois	\$ 83,310.00
Ethel's Woods Forest Preserve: Integrated Lakes Management, Inc., Waukegan, Illinois	\$ 91,225.20
