

Amphibian Scavenger Hunt

Enjoy a walk around your yard or neighborhood while searching for amphibians
(and the things they need).

____ Small ponds or pools of water

____ Dead logs or woodpiles

____ Dead leaves on the ground from last year

____ **Western Chorus frog** (may be calling—listen for a sound that sounds like you are running your fingernail along the teeth of a comb)

____ Food for amphibians: spiders, slugs, worms, beetles

____ **American toad** (may be calling—listen for a high-pitched trilling noise coming from a pond or marsh on warm spring days)
