**BACKGROUND:** Invasive plant management is the most time-consuming task faced by District crews, and is a significant challenge to habitat conservation. Management of invasive plants is necessary to improve and conserve habitat quality and species diversity on District properties throughout Lake County. To more efficiently accomplish this work, the District hires contractors on an hourly basis to complete several projects to control herbaceous invasive plants.

The District advertised for bids for multiple, separate clearing projects within Lake County. Work includes all labor, equipment and materials to control select invasive plants, including, but not limited to: reed canary grass, teasel, cattails, common reed, Japanese knotweed, leafy spurge, fig buttercup, crown vetch, common goldenrod, and oriental bittersweet.

The multiple District sites included in the projects include, but are not limited to:

- Sun Lake Forest Preserve
- Buffalo Creek Forest Preserve
- East Invasive Plant Management (IPM):  
Edward L. Ryerson Conservation Area, Grainger Woods Nature Preserve, MacArthur Woods, Captain Daniel Wright Woods & Stevenson Home, Greenbelt, Wadsworth Prairie Nature Preserve, Lake Carina, Pine Dunes, Oriole Grove, Lyons Woods, Old School, Fort Sheridan, and Prairie Wolf Slough
- West Invasive Plant Management (IPM):  
Lakewood, Almond Marsh, Van Patten, Rollins Savanna, Gander Mountain, Ray Lake, Raven Glen, Nippersink, Singing Hills, Heron Creek, and Kettle Grove

The projects were advertised on November 26, 2019 and seven bids were received. Work is anticipated to begin April 1, 2020 and be completed by February 28, 2021. A summary of the bids received is listed below, with the low bids highlighted:
